

**Rackmount Cases for Electronic Equipment**

The Pelican Rack Cases provide protection and ease of access to electronic equipment in the field. Available in four product families with different protection levels and sizes, the Rack Cases are also fitted for secure stacking.

Contact us for additional details

**MAC Rack family**  
Provides less fragile equipment with good protection from shock and vibration in a compact case. Ideal for gear weighing 20-200 lbs. and a fragility between 50-80 G's

**Classic Rack family**  
Designed for extremely fragile equipment that requires the maximum possible protection from shock and vibration. This case securely transport rack mount equipment from 20-340 lbs., typically with a fragility rating between 15-30 G's

**SuperMAC Rack family**  
Protection for moderately fragile equipment, typically with a fragility of 40-70Gs). The most compact container with removable rack option

**ProRack family**  
Not shock mounted or cushioned, they still provide unparalleled protection from direct impact and exposure to the elements. Designed for equipment up to 75 lbs., typically with a fragility from 80-120 G's

**Rugged Mobility**

Hardigg has a complete line of transport cases for electronic equipment, computers, medical supplies, etc., and quickly deployable field desks, bookcases and footlockers.
