

Special Vehicles for Telecommunications

RF COM has a specialized installation team for Telecommunication Equipments on vehicles such as:

- Survey/Drive test vehicles for wireless networks
- Spectrum monitoring
- Broadcast networks mobile units (news gathering)
- HDTV Coverage tests

RF COM uses the best accessories available on the market, and strictly follows all installation recommendations from the equipment manufacturer, having prepared more than 150 telecommunication vehicles in for Drive Test.

Each installation project is designed to best suit the client's needs, including if necessary the auxiliary energy system, all electric/electronic integration of the installed systems.

* value for reference; depends on the vehicle
