

Telecommunications Van

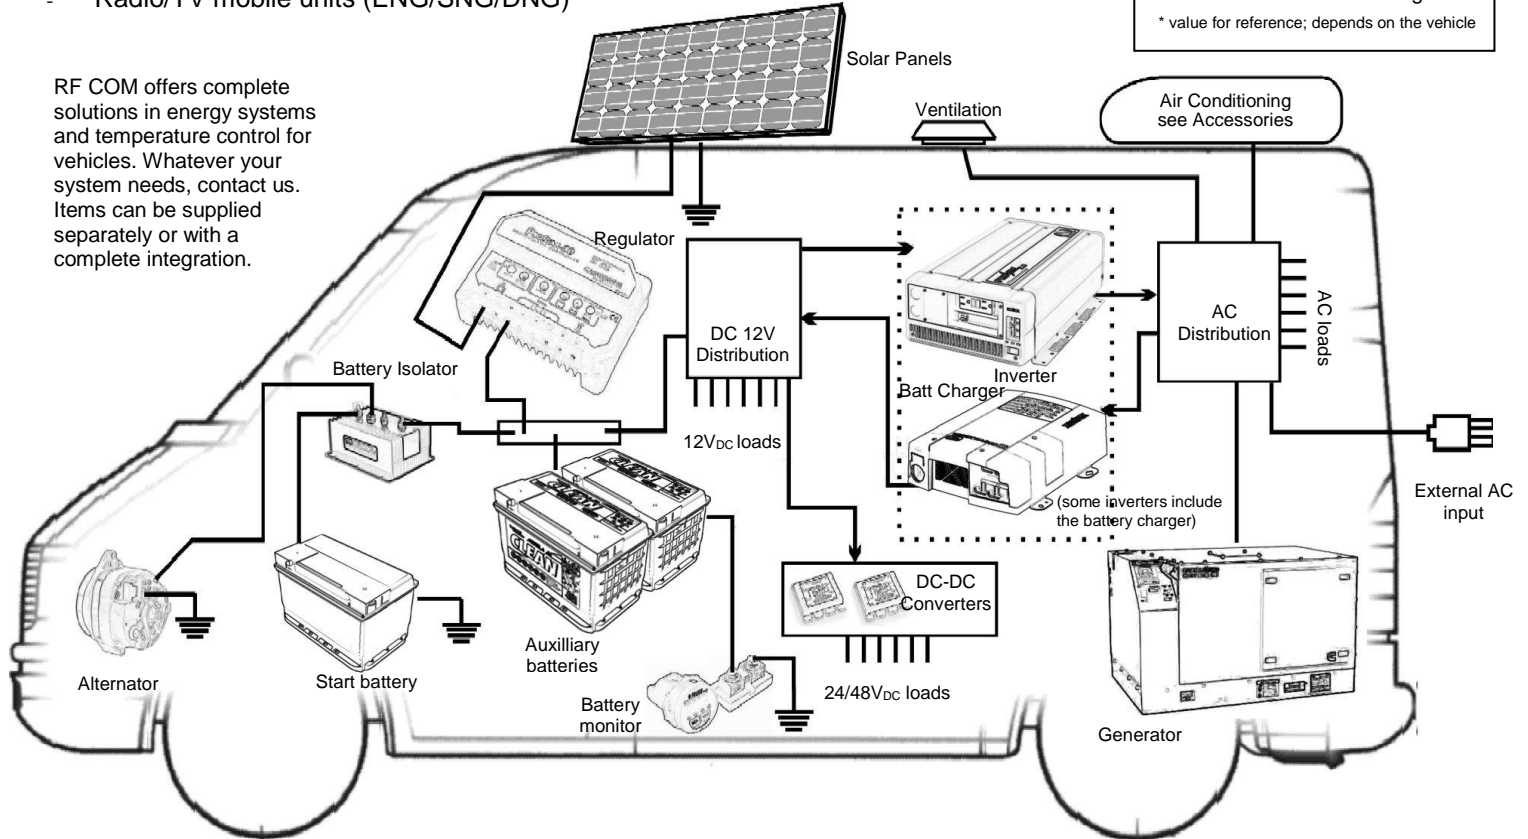

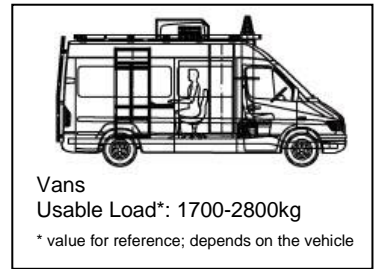

RF COM can integrate any vehicular telecommunications system, including auxiliary energy systems, telescoping pneumatic masts, and automatic vehicle leveling.

Application examples:

- Cellular optimization (drive test)
- Spectrum Monitoring
- Radio/TV mobile units (ENG/SNG/DNG)

Contact us for a solution designed for your needs

RF COM offers complete solutions in energy systems and temperature control for vehicles. Whatever your system needs, contact us. Items can be supplied separately or with a complete integration.

Generator

Energy connections panel, leveling commands and masts.
